

7-SIGMA Simulation Systems

Bronchoscopy Trainer

7-SIGMA Simulation Systems has developed a trainer that allows for a bronchoscopy on a high fidelity bronchial tree. The model includes all of the signature aspects of a real patient and goes to the 4th generation of bronchial airways.

Features & Solutions

- Accurate representation of a posterior membrane
- Tracheal rings
- High fidelity tissue appearance including microscopic blood vessels
- Model correctly represents right upper lobe, right middle lobe, right lower lobe, left upper lobe, & left lower lobe
- The right upper lobe includes the apical, anterior, and posterior bronchi
- Soft silicone material for realistic tactility
- 4th order segmental bronchi
