

Adult Swollen Airway Skills Trainer

7S³ has created the first and only anatomically accurate unique pathology for edema associated with airway obstruction. The 7S³ modular airway training system is unparalleled in its attention to details that assist the health care practitioners in providing superior patient care and experience in successful intubation. The 7S³ adult airway emulates that of a patient with anaphylaxis or partial angioedema with swelling of the eyes, lips, and tongue. The internal airway includes swollen epiglottis and uvula. The face is easily removable for access to or a replacement of the jaw and airway.

Our team of engineers, clinicians, technicians, scientists, artists, and customer service representatives work to assure your experience is unsurpassed in expectations. Our unique products have the following features:

- ✓ Realistic Intubation Using New Technology Polymer Solutions
- ✓ Patented Modular Design with Easy Switch to Various Pathologies, Training Needs, and Preferences
- ✓ High – Fidelity and Performance
- ✓ Torso Components: full, partial, and go-light
- ✓ Airway Components: novice, advanced, burn, and swollen
- ✓ Superior Quality at Competitive Prices
- ✓ Supports Sellick maneuver training
